

Network Partners

- Network Partners MSA wants to provide all MSA users with a seamless user experience, no matter what network they are using or where they are. We want to partner with leading access providers to ensure that all of our customers can use MSA whether they're at home on a fixed line, on-the-move with their mobile phone, pager or using their laptop to make a system change in a Wifi hotspot.

MSA strives to be agnostic of the underlying network and we invite access providers to partner with us to make this a reality. By working with MSA, providers of fixed, mobile or Wifi networks can differentiate their offering by providing MSA services to their customers.

Partnering with MSA will help to grow your subscriber numbers, drive uptake of data services and increase revenues per user. MSA's system services can also be bundled with subscription packages and hardware provided to your customers.
